The image is a composite of three screenshots from a Windows 10 desktop, illustrating the steps to use Quick Assist. The desktop background is the standard Windows 10 blue wallpaper with various application icons on the taskbar and desktop. The screenshots are overlaid on each other, showing the progression of the tutorial.

Step 1: The search bar in the bottom-left corner of the taskbar is highlighted with a red circle. The text 'qui' is entered into the search bar. A blue arrow points from the search bar to the search results.

Step 2: The search results for 'Quick Assist' are displayed. The 'Quick Assist' application icon is highlighted with a blue arrow. The search results show the application name and several actions that can be performed, such as '開く' (Open), '管理者として実行' (Run as administrator), and 'アンインストール' (Uninstall).

Step 3: The Quick Assist dialog box is open. The '支援を受ける' (Get help) section is selected. A blue arrow points to the input field for the code provided by the assistant. The dialog box also includes a section for '支援を提供する' (Provide help).
